

LABORATORY OF COMPUTED TOMOGRAPHY

Accredited laboratory provides unique non-destructive testing method (micro CT and nano CT) for inspection of inner structures.

Research includes the development and application of tomographic methods in various fields.

EXPERTISE

Coordinate measurement.
Leakage detection.
Porosity analysis.
Analysis according to
P 201/VW 50097 a P 202/VW 50093,
ASTM E505.
Wall Thickness Analysis.
OK/NOK parts comparison.
Mold correction.
Fiber Composite Material Analysis.

OUTPUTS

Cross-sections with data viewer.
Pictures and videos.
STL and STP model.
Report in CZ, EN.
